## COLOR MATCH & G-SHADE PRIMER/SEALERS

We've talked about the importance of using the correct G-Shade primers and sealers. **With today's tri-coats and translucent colors it is IMPERATIVE to DO A SPRAY OUT** with the correct G-Shade color and spray for color match not hiding. The old school of thought is there had to be hiding. Today's manufacturers are using the undercoat color to achieve the vibrant translucent colors. Typically if we get a question on color match, doing a spray out with the correct G-Shade undercoat helps us to get a color match. When mixing with **PPG Paint Manager** there is a recommended undercoat color so taking the time to do a correct spray out and building a good spray out card library will save you time in the long run. Typically on any color it is recommended to do a spray out before the vehicle gets into the booth to save time and materials.

### E-Fiche Software is Discontinued

**PPG** is currently shipping the final E-Fiche software CD's. If you are still using E-Fiche, we highly encourage you to use the more intuitive, user friendly and innovative **COLORMOBILE®** software application. The application gives you instant access to the newest color formulations through your desktop computer, mobile or tablet device with 24/7 connectivity to the latest Prime, Variant and Special field formulas. For any questions or concerns, please contact your Auto Body Supply representative.

### NEW STAFF MEMBER

Russ Schnittker is the newest staff member at **Auto Body Supply** and is part of our delivery team. Please help us welcome Russ!

## MVP TRAINING

**Production & Cycle Time  
Management**

Sept 26 & 27<sup>th</sup> - St Louis, MO

Demands on cycle time are increasing at lightning pace. This course focuses on "keys-to-keys" practical applications used by progressive collision centers to improve cycle time performance and enable vehicles to flow smoothly through the production process. Participants will also gain insight to successfully manage the most important asset in a collision center—the production staff! Come learn the foundational principles and improvements that can be implemented on the shop floor to dramatically advance production and reduce cycle time in your shop. **AMI & I-CAR approved.**
