## DEVILBISS

## The Next Generation Spray Gun

The DV1 is optimized to spray the most challenging basecoats or clearcoats on the market today

Produces an even distribution of fine, uniformly sized particles that easily wet-up a surface and flawlessly hang on vertical panels.

Delivers higher application speeds at lower pressures, enhancing the overall productivity and efficiency of the gun.

Easy to set-up and easy to use — painters of all levels are able to move quickly and efficiently while replicating nearly any finish virtually effortlessly.

Features a quieter application experience from a soft-spraying gun, ultimately making the DV1 more enjoyable to use.

Produces an even, stable and consistent spray fan to apply the glass-like clearcoat finish painters know and love.

Provides painters the ability to produce a consistent overall finish across the whole work area — with minimal effort— giving painters more control of the spraying process.
